

InstructionUse of TechnologyOnline Social Networking

The Internet and electronic communications have vast potential to support curriculum and student learning. The Board of Education (Board) believes they should be used in school as a learning resource both in developing student literacy and providing on-going professional staff development activities. The Board realizes that existing and emerging smart technologies present new challenges and opportunities to the educational community.

The purpose of this policy is to set forth policies and guidelines for access to the district's computer system and acceptable and safe use of Internet social networking tools/sites.

Users are expected to use Internet access through the district's system to further educational and personal goals consistent with the district's mission and school policies. The district's computer network is considered a limited forum enabling the restriction of speech for valid educational reasons. For safety purposes, the district employs both Internet filters and firewalls.

Online social media includes but is not limited to open online services which promote expansion of professional and or social contacts through user provided information. Online educational networking media is that which has been developed specifically for the educational community while simultaneously addressing district concerns regarding the protection of student privacy and safety.

Students may use district approved online educational networking sites. Students may not access non-district approved sites using district equipment, while on district property and never during the school day. The district will not be liable for information/comments posted by students on social media.

Among the uses that are considered unacceptable and which constitute a violation of this policy are the following:

1. Uses that violate the law or encourage others to violate the law. This includes the transmittal of offensive or harassing messages; offering for sale or use any substance the possession or use of which is prohibited by district policy; viewing, transmitting or downloading pornographic materials or materials that encourage others to violate the law; intruding into the networks or computers of others; and downloading or transmitting confidential, trade secret information, or copyrighted materials.

2. Uses that cause harm to others or damage to their property. This includes defamation (harming another's reputation by lies); employment of another's password or some other user identifier that misleads message recipients into believing that someone else is communicating or otherwise using his/her access to the network or the Internet; uploading a worm, virus, "trojan horse," "time bomb" or other harmful form of programming or vandalism; participation in "hacking" activities or any form of unauthorized access to other computers, networks, or information systems.

3. Uses that jeopardize the security of student access and of the computer network or other networks on the Internet. For example, disclosure or sharing personal passwords with others; impersonation of another user.

4. Uses that are commercial transactions. Students and other users may not sell or buy anything over the Internet. Private information shall not be shared.
